Bring your records to life...

Ayre P-5x phono preamplifier

Revel in all of the musical nuances you were meant to experience. Enjoy your vinyl collection as never before.

The Ayre P-5x phono preamplifier uncovers the astounding musicality in your favorite records. Music flows from a pure black background, thanks to ultra-low noise FET circuitry in a zero-feedback configuration. Fully adjustable gain and loading options provide complete compatibility with the widest possible range of cartridges, from low-output exotic moving coils to high-output moving magnet designs. Our proprietary two-stage passive RIAA equalization ensures unparalleled tonal realism. The Ayre P-5x infuses new life into a classic format.

Features:

- Fully balanced from input to output
- Zero feedback
- Ultra-low noise discrete FET circuitry
- Two-stage passive RIAA equalization
- Balanced and single-ended inputs and outputs
- Adjustable gain accommodates very low to high output cartridges
- Cartridge loading is adjustable with switches on back of unit
- Custom high quality capacitors
- Special high-speed circuit board material
- Ayre Conditioner™ (patent pending) power-line RFI filter

Specifications:

- Gain: 50 dB, 60 dB, 70 dB to balanced outputs
44 dB, 54 dB, 64 dB to single-ended outputs
- Input Impedance: 47 k Ω , 1000 Ω , 100 Ω
- Frequency Response: RIAA curve accurate to ± 0.05 dB
- Power Consumption: 10 watts
- Dimensions: 17.25"W x 13.75"D x 2.38"H
- Weight: 12 pounds (5.5 kg)

The heart and soul of music and film reproduction.
